

Metris®. Talis®. Focus®.

ComfortZone. Comfort at all levels.

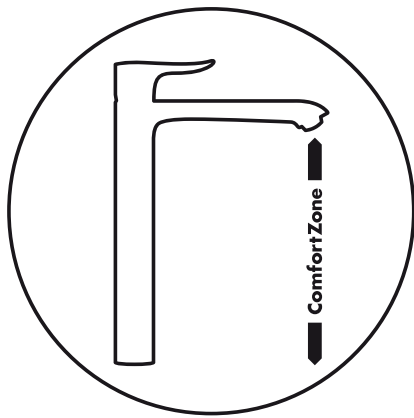

Treat yourself to more space.

With Metris, Talis and Focus.

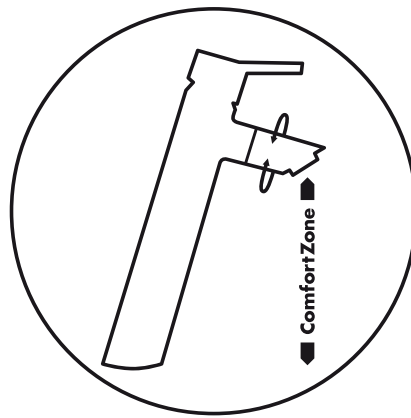

The bathroom has long been more than just somewhere where we take care of physical hygiene. It has become a home living area. Metris, Talis, and Focus now give you the

freedom to design this room just as you want to. We all use water differently; we all have our daily rituals and our own tastes. These different requirements are met by our new

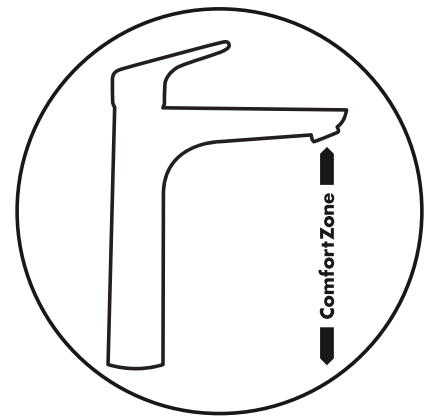

mixer series – by individual height, form and function.

Metris 100

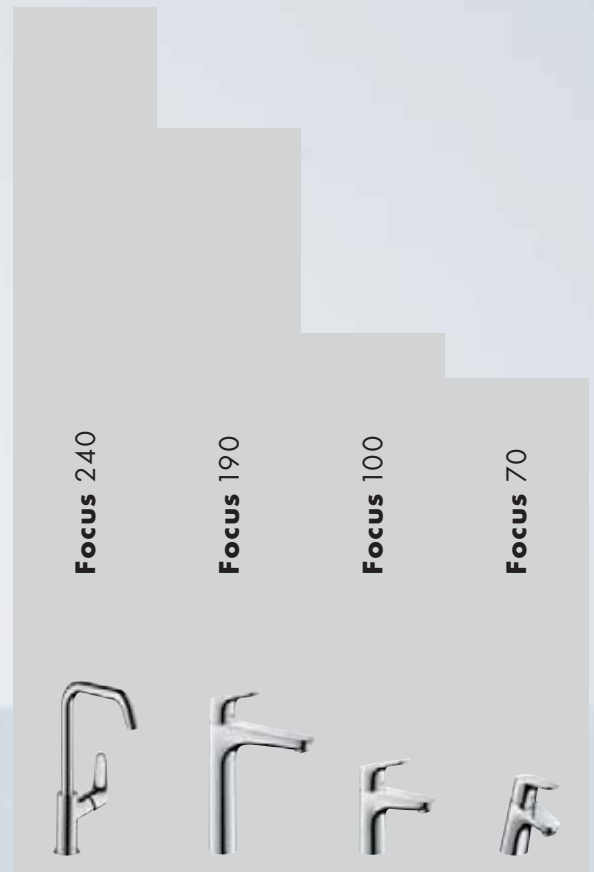

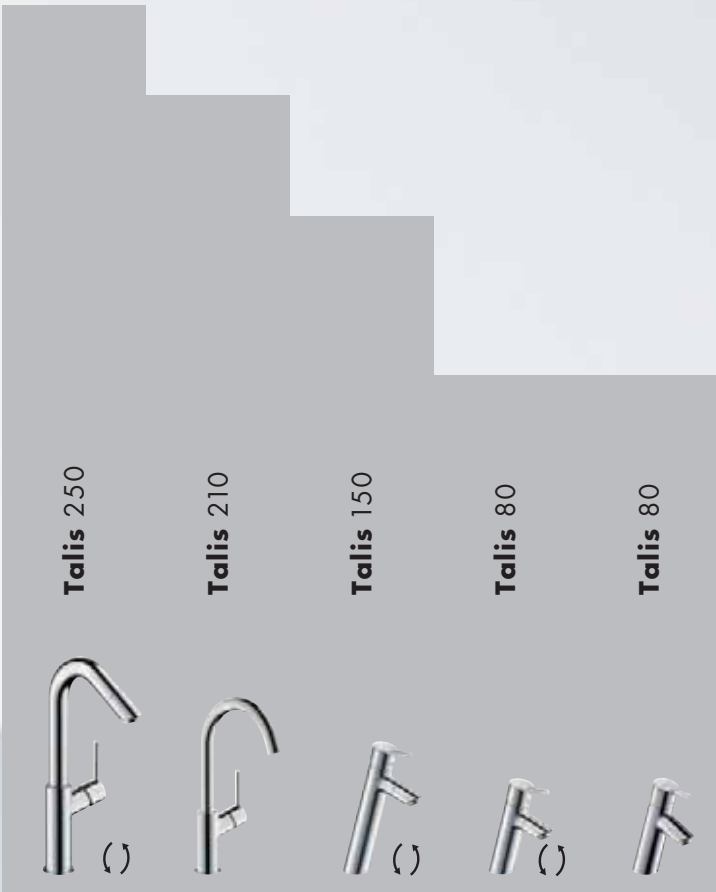

Pleasant: noticeably more comfort in daily life.

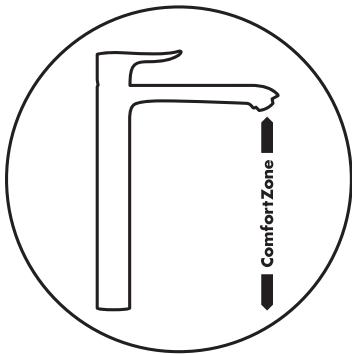

Practical: more room for washing hands.

Luxurious: Also easy to fill tall containers.

Meet your own requirements.

With your own very personal ComfortZone.

The height of a basin mixer determines your flexibility in the use of water. Do you just want to have more room to move when washing your hands, or do you want to have enough room to be able to fill a watering can with ease? One thing is certain: the higher the mixer, the more flexibility you will have in your daily life.

We have a name for the individually utilizable area between washbasin and mixer:

ComfortZone. It's having a little bit more comfort when you're brushing your teeth in the morning. It's having added flexibility if you decide you quickly want to wash your hair. It's having the lovely feeling of being able to decide more freely how you want to use water.

And when you have decided on the height and chosen your favorite design, you can then choose from the many combinations of

mixer and washbasin. Do you want a wall-mounted or lay-on ceramic?

Find your own personal solution with Metris, Talis, and Focus. Or rather, your own very personal ComfortZone, and create the space you need for your requirements.

Metris®.

Comfort at all levels.

Experience our stylish mixer line.

Metris presents perfect design that meets every requirement for daily comfort. Enhance your guest bathroom, you can fill tall containers with the greatest of ease, or

better still, lean over the basin to wash your hair. This mixer line really does provide you with plenty of freedom in daily life - from the ComfortZone 100 and the flexible spout

of the Metris 230 to the high riser with the generous ComfortZone 260.

Talis®.

Comfort in every form.

Discover our range of intelligent mixers.

Talis is more than a mixer. Talis is a true daily helper. Even when using it for those simple everyday tasks, you will soon see how

incredibly useful the swivel spout is. With its arch shaped jet, it provides you with the maximum of comfort when brushing your teeth.

You could say that this mixer increases your personal ComfortZone at the touch of a hand.

Meets your requirements – and those of the environment.

For maximum water pleasure with intelligently reduced water consumption.

The three mixer lines that have been presented to you in this brochure demonstrate quite clearly that sustainability and pleasure do not have to be mutually exclusive. Quite the opposite, in fact: Metris, Talis and Focus now combine ease of use with sustainable technologies. This is made possible by innovative developments such as EcoSmart, with which you can now reduce your water consumption

by up to 60%. The integrated precision O ring keeps the waterflow constant whenever the water pressure fluctuates. As this means that less water has to be heated, you also save energy and reduce your CO₂ output. That is only one of the reasons why we are also one of the first companies whose products have received the newly created WELL certificate by the European association of mixer manufacturers for our products. WELL

stands for "Water Efficiency Label". Thanks to the AirPower technology, generous quantities of air are added to the reduced waterflow. This makes the water jet particularly full without splashing. And QuickClean guarantees that you will have years of pleasure with our products, because it makes it easy to remove limescale deposits from the spout simply by rubbing them away at regular intervals.

Lots of air in the water results in a particularly soft jet.

Simply rub the flexible silicone nubs to remove limescale deposits.

Limits the flow through your mixer mixer to save water and energy.

EcoSmart-technology

The precision O ring responds flexibly to keep the waterflow constantly: if the water pressure is high, it reduces the size of the flow opening. If it is low, it increases the opening.
